

LIMS

Laboratory Information Management System

integrated laboratory data management specifically designed for the radioanalytical sector

The Raddec-LIMS system is an integrated laboratory management package designed for efficient management in busy radiochemical laboratories. The software has been developed, tested and proven through routine use in a leading ISO17025:2005 accredited laboratory

Key features

- Integrated software for effective data, job and financial management within the analytical laboratory
- Intelligent use of performance data to support training, quality control and quality assurance objectives
- Straightforward installation and set up allowing rapid implementation of the system
- Adaptable platform enabling the system to be tailored to a particular laboratory's requirements.

Specifications and system requirements

Job management	Sample / job log in and job data summary Job tracking function. Detailed job listing functions Job review
Data management	Results database and automated report generation. Direct data transfer from Fitzpeaks gamma spectrometric and LSC+ software or upload from spreadsheets or manual data entry.
Quality assurance	Working instruction database Integrated equipment inventory and failure logging. Integrated approved supplier database and ordering function.
Quality Control	Integrated equipment inventory and failure logging. Rapid and detailed assessment of QC data, generation of Shewhart plots and QC summaries for a specified job, analysis type, or analyst.
Performance monitoring	Generation of performance data including jobs completed to deadline, days overdue, jobs per customer, number of analyses, jobs requiring re-analysis, reports re-issue, job acceptance levels, customer feedback.
Training and authorisation	Integrated analyst training database linked to sample analysis selection. Multi-level access control allowing controlled access to key areas of the system. Remote customer access to selected areas of the system.
Financial management	Generation of quotations / invoices and financial summaries
